# Share their world

## What is it?

Author's Origins is a phone app that shows four authors (for now) original works for all to read. It gives you a brief description of each writer and shows all of their works. It also gives a brief summary of each work and then goes into each story for the viewer to read. Each week chapters are released on stories or short stories are released to keep the reader entertained and coming back for more. While scrolling, text will appear on the screen as if being written then and there as it is being read.

Being an app, it will be available on your phone or tablet. There will be interactions unique to phone such as the text appearing as you read and 'notes'. This is a society where everyone has their phone on them. The reader can carry the stories with them in their hand and read them no matter where they are or what they are doing. Having chapters or short stories posted at intervals keeps them entertained and coming back for more.

Being on a phone or tablet it gives readers the chance to read anywhere at anytime. It is tailored for their phone or tablet so there is no hassle with trying to zoom in or out to read. Eventually readers will have the option to log in and post their own stories for the public to read. 'Notes' will be enabled where readers can highlight their favorite parts of the story and leave comments for authors and other readers to read.

## Who is it for?

Author's Origins is for anyone who likes to read. It can have whatever the author feels like putting on there. It can range from children's stories to romance to fantasy. So it can be an app for all ages.

## Course Competencies-

Develop a project from concept to prototype:  
Original app planned and designed out

### Create document deliverables:

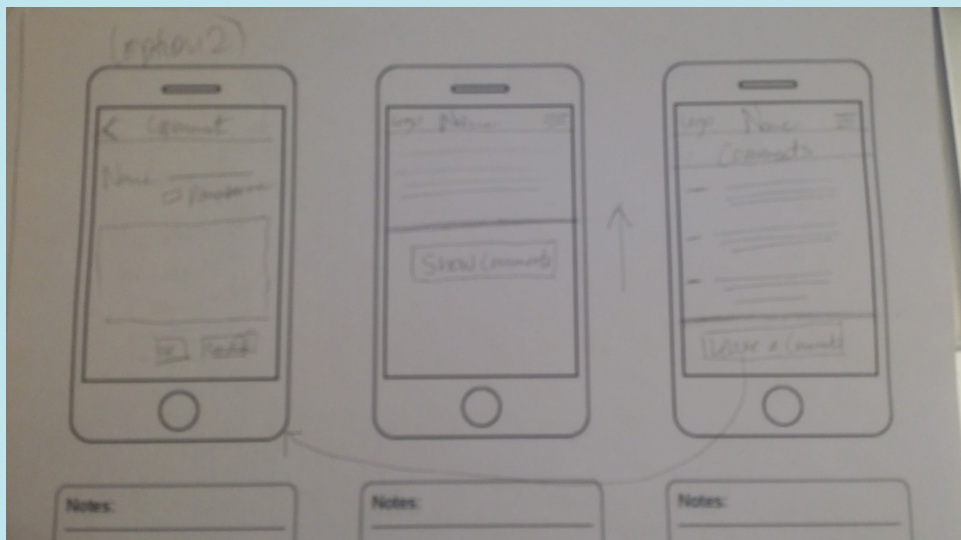

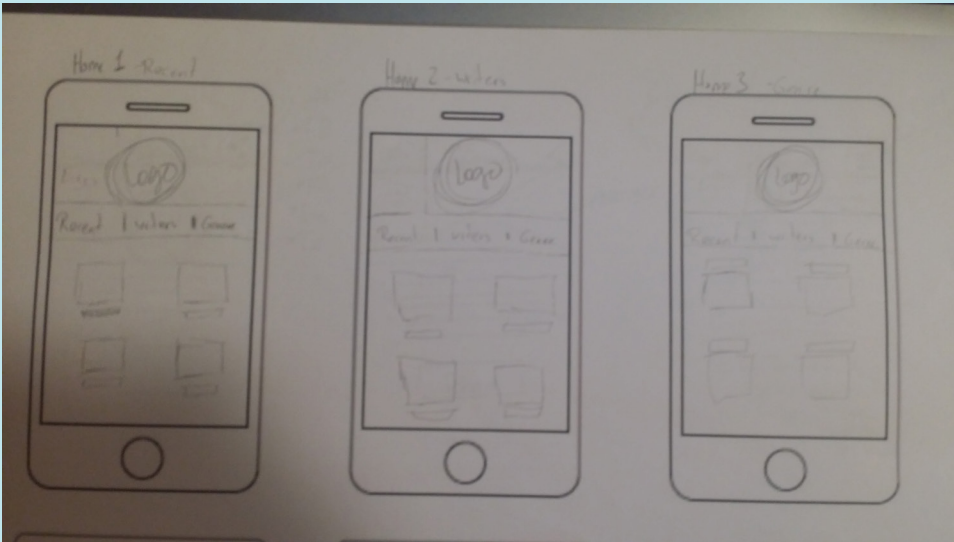

Plan of the app, writers info, writers stories, wireframe

### Create working prototype:

Find a program to design a mockup in
